RE: Transfer Station Repair Costs

Attention: Mr. Peter Tarnawsky, CAO

As discussed over the last few weeks, the Redwater Transfer Station developed an issue in the center of the area where the trucks pick up and deliver the bins (picture attached). The Roseridge Waste Commission is operating the site and advised the Town of the situation. The Commission Manager did acquire a number of quotes to fix the area and agreed to facilitate this project. They proceeded with hiring Karkam Holdings Ltd. with a cost quoted at \$9,750 (copy attached). The Town did receive an email from the Roseridge Commission Manager stating the following:

*" \$9,700- but I told the contractor if any cost go over that the Commission will absorb.
We put a pump and bell hole in to keep moving the water out, this was over and above
the quote to repair so we will take that on. "*

The Town of Redwater is asking if Sturgeon County will consider cost sharing the expense related to this repair. This repair is not a capital upgrade but rather a capital maintenance issue. We have been advised that the area should be graveled and maintained more frequently in order to keep the area safe and passable.

Prior to the Roseridge Commission taking over operations, the agreement between the Town of Redwater and Sturgeon County included a 2/3 County and 1/3 Town cost sharing on the variable expenses, which are those expenses incurred due to usage. The frequency the subject area is used is based on the number of bins that must be removed and replaced thus directly related to the amount of waste. In speaking with the Roseridge Commission Manager, the usage remains as it was over the last many years, stating 66% is County entry and 33% is Town entry. This of course, does not include load sizes as there is no scale at this site.

We therefore are asking if the County will cost share this expense based on usage, being 66% County, 33% Town.

Thank you for considering this request.

Yours truly,
Deb Hamilton
Town Manager
