

Roshan Water™ Solutions

Clear Water, Bright Future

How E.coli and Total Coliform Tests in Water are Done

Current Solution

Challenges

Delays

To receive test results

Transportation

Of samples to centralized lab

Potential COC Errors

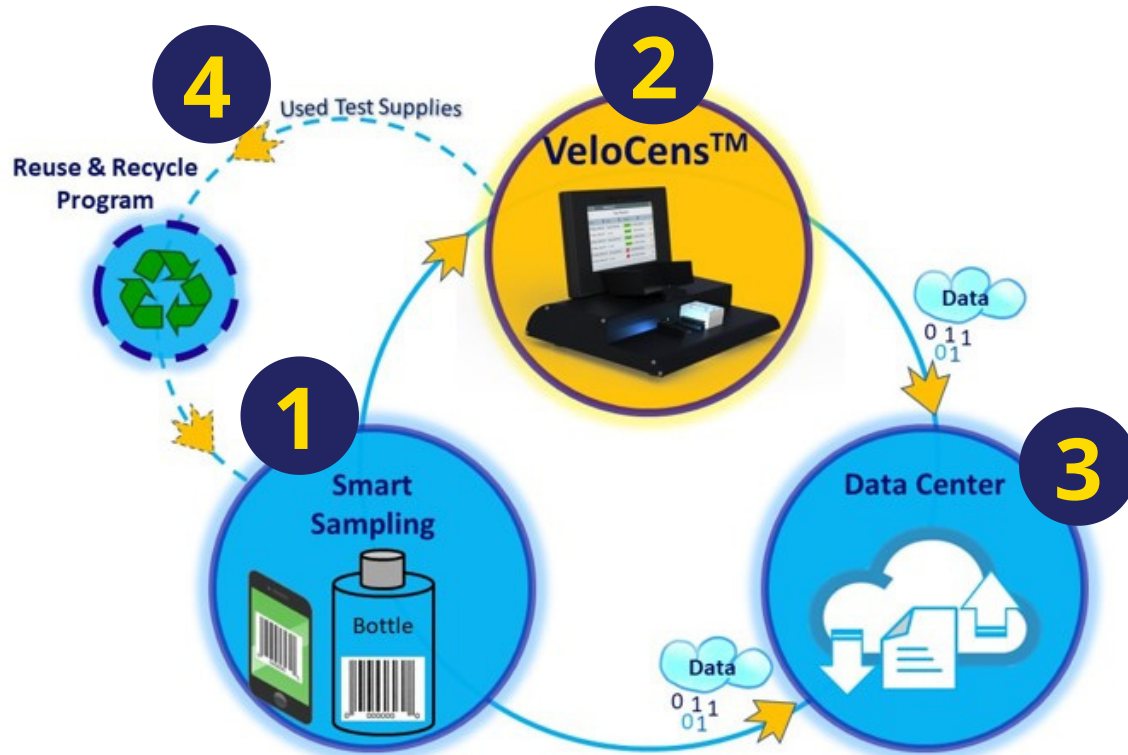

When manually completing forms

- Delayed decisions to communicate potential health risks to citizens, make process adjustments in facilities, and sign off on infrastructure/repair projects
- Risk of compromising sample integrity due to bad weather or unforeseen travel delays
- Transcription errors on Chain of Custody (COC) forms lead to sample rejection

Our VeloCens™ Product Package

1-Hour Quantification of Bacteria-Free Water in 4 Easy Steps:

1

Collect samples: Automatic logging of information including date, time and sample collection location.

2

On-site, Rapid Testing: Easy to follow instructions to prepare samples for on-demand tests that provide enumerated results in 1 hour.

3

On-line Results: Log in to your data center account 24/7 to see all test locations and results

4

Reuse and Recycle: Return all consumables to us with the return shipping label we provide and we will take care of the rest!
